Profile Summary

B.Tech Data Science student skilled in Data Engineering, AI/ML, and Software Development. Proficient in Python, SQL, REST APIs, PostgreSQL, and MySQL, with experience in data pipelines, full-stack development, LLM evaluation, and workflow automation.

Technical Skills

- **Programming Languages:** Python, SQL, C++, JavaScript (ES6+), HTML5, CSS3
- **Data Engineering:** ETL Pipelines, Data Processing, Data Validation, Data Quality Assurance, Workflow Automation
- **Databases:** PostgreSQL, MySQL, Supabase, Database Design, SQL Query Optimization, Relational Schemas
- **Machine Learning & AI:** Supervised & Unsupervised Learning, Large Language Models (LLMs), Model Evaluation, LLM Post-Training, Predictive Modeling, Data Mining, Pandas, NumPy, Scikit-learn
- **Web Development:** React, NodeJS, ExpressJS, Flask, REST APIs, Full-Stack Architecture
- **Cloud & Tools:** Amazon Web Services, Git, GitHub, Linux, VS Code, Agile/Scrum Methodologies

Internship Work Experience

- **LLM Post Training Intern (Paid Internship)** Feb 2026 – May 2026
Ethara AI *Remote*
 - Processed and evaluated 50,000+ Large Language Model (LLM) outputs, improving response quality, data consistency, and AI system performance through large-scale validation and analysis.
 - Developed Python-based data processing and validation workflows to automate anomaly detection and text preprocessing, reducing manual verification effort and accelerating evaluation cycles.
- **Full Stack Development Intern (Paid Internship)** Oct 2025 – Feb 2026
Kanchan Pvt Ltd – Web Development Wing (Sapphire) *Remote*
 - Designed and developed scalable full-stack web applications, REST APIs, and database-driven solutions using MySQL and PostgreSQL, improving application performance and data management efficiency.
 - Built and deployed the **RevU Social** platform (revu.social) and leveraged GenAI-assisted development practices to accelerate feature delivery and streamline development workflows.

Projects

- **RevU Social – Full-Stack Review & Analytics Platform** Oct 2025 - Feb 2026
 - Developed a full-stack social review platform (revu.social) using React, Node.js, MySQL, and REST APIs for community engagement and content management.
 - Designed scalable database schemas and backend services for secure data storage, validation, and high-performance data retrieval.
 - Implemented analytics and reporting workflows to support structured insights and user-driven interactions.
- **AYU – Modular AI Personal Assistant** 2023 – Present
 - Built a modular AI personal assistant in Python with workflow automation, database integration, and extensible service-oriented architecture.
 - Developed intelligent task automation modules with structured logging, data validation, and background processing capabilities.
 - Engineered a scalable, multi-component system supporting API integrations and efficient information management workflows.

Education

- **Oriental Institute of Science and Technology, Bhopal** 2023 - 2027
Bachelor of Technology (B.Tech) in Data Science
- **Bardsley English Medium Senior Secondary School, Katni** 2021 - 2023
Higher Secondary Education (Class X & XII)

Certifications

- **IBM SkillsBuild:** Machine Learning with Python (ML0101EN) June 2026
- **Infosys Springboard:** AWS Certified Developer - Associate Certification June 2026
- **HP LIFE (HP Foundation):** Data Science & Analytics June 2026

Relevant Coursework

Core Subjects: Data Structures and Algorithms (DSA) • Database Management Systems (DBMS) • Data Mining and Analytics • Machine Learning • Software Engineering (SDLC) • Operating Systems (OS)
