## Summary

Innovative B.Tech in Data Science student with hands-on experience as a Full-Stack, AI/ML, and Data Engineering intern. Proficient in designing scalable data pipelines (ETL/ELT), training and fine-tuning machine learning models, deploying autonomous agentic workflows (LangGraph/RAG), and developing responsive full-stack applications. Proven track record of automating workflows, optimizing database performance, and validating system quality. Highly analytical with a commitment to technical documentation and building high-performance, compliant software.

## Education

**Oriental Institute of Science and Technology**  
Bachelor of Technology (B.Tech) in Data Science

Bhopal, Madhya Pradesh, India  
2023 – 2027

## Skills & Competencies

**Programming & Web Development:** Python, SQL, JavaScript, C++, FastAPI, React.js, Node.js, Express.js, REST APIs, JSON/JWT, HTML/CSS

**AI, ML & Computer Vision:** Deep Learning, NLP, Generative AI, Large Language Models (LLMs), LangChain, LangGraph, RAG, Scikit-learn, PyTorch, TensorFlow, OpenCV, EasyOCR

**Data, Cloud & MLOps:** Data Pipelines (ETL/ELT), Data Modeling (Star/Snowflake), Data Validation & QA, PostgreSQL, MySQL, Supabase, FAISS, Vector Databases, AWS, Git, GitHub, Docker, Linux

**Workflows & Competencies:** Agile/Scrum, Software Development Life Cycle (SDLC), Problem Solving, Technical Documentation, Incident Troubleshooting, SLA Compliance, Data Privacy

## Experience

### Ethara AI

Remote

*LLM Post Training Intern (Paid Internship)*

Feb 2026 – May 2026

- Evaluated 50,000+ model outputs for post-training alignment, performing prompt engineering, model validation, and data quality assurance to optimize generative model outputs.
- Engineered Python automation scripts and workflows for data preprocessing and validation, reducing manual inspection time.
- Documented experimental results, model capability matrices, and internal knowledge base articles to maintain data privacy and compliance standards.

### Kanchan Pvt Ltd – Web Development Wing (Sapphire)

Remote

*Full Stack Development Intern (Paid Internship)*

Oct 2025 – Feb 2026

- Engineered and deployed the full-stack architecture of "RevU Social" (revu.social) using React.js, Node.js, and REST APIs, improving user engagement and analytics.
- Designed and optimized relational databases in MySQL and PostgreSQL, writing optimized SQL queries, indexes, and schemas to ensure high data transaction speeds.
- Configured secure user authentication (JWT) and deployed server modules on Linux cloud environments, handling configuration and bug patching.

## Projects

### KALKI 1.5 – Enterprise Intelligence Operating System (IOS)

2024 – Present

*Technologies: Python, PyTorch, LLMs, VLMs, Autonomous Multi-Agents, Hybrid RAG, Defensive Cybersecurity*

github.com/KGupta171025/KALKI-1.5

- Architected an autonomous multi-agent operating system integrating LLMs, Vision Language Models (VLMs), and multi-agent workflows using LangGraph and LangChain.
- Engineered a hybrid Retrieval-Augmented Generation (RAG) pipeline, integrating vector databases to optimize retrieval speeds by 40%.
- Programmed secure APIs and communication protocols, implementing risk assessment and logging frameworks for real-time agent networks.

### SHELF-SCANNER – AI-Powered Book Discovery Platform

2025 – Present

*Technologies: Python, OpenCV, EasyOCR, Sentence-Transformers, FAISS, FastAPI, React*

github.com/KGupta171025/SHELF-SCANNER

- Developed an AI-powered book discovery application that processes image uploads of bookshelves to recognize individual book titles.

- Engineered a pipeline combining OpenCV for image preprocessing (deskewing, thresholding) and EasyOCR for high-accuracy text extraction.
  - Integrated Sentence-Transformers to generate high-dimensional book description embeddings, implementing a FAISS vector database for semantic search and real-time recommendations.
- RevU Social – Full-Stack Review & Analytics Platform**  
*Technologies: React, Node.js, REST APIs, MySQL, PostgreSQL*

Oct 2025 – Feb 2026  
revu.social
- Developed a responsive full-stack review management and analytics web application using React.js, Node.js, and REST APIs.
  - Designed database schemas in MySQL/PostgreSQL, using dimensional modeling (star schema concepts) to support user analytics dashboards.
  - Programmed secure user session management and frontend-backend communications, ensuring accountability.

Certifications

---

- **AWS Certified Developer Associate** (Infosys, Jun 2026)     **Machine Learning with Python** (IBM SkillsBuild, Jun 2026)
- **Data Science & Analytics** (HP LIFE, Jun 2026)     **Neural Networks and Convolutional Neural Networks** (LinkedIn, Jun 2026)
- **Deloitte Australia Data Analytics Job Simulation** (Forage, Sep 2025)     **Tata Data Visualisation** (Forage, Sep 2025)
